Errata: The X-Ray Emission Measure (EM) of the Young Stellar Objects (YSOs) in the ρ Ophiuchi (ρ Oph) and Monoceros R2 Dark Clouds (Mon R2)

Kensuke Imanishi¹, Makoto Kohno¹, and Katsuji Koyama¹

kensuke@cr.scphys.kyoto-u.ac.jp, kohno@cr.scphys.kyoto-u.ac.jp,
koyama@cr.scphys.kyoto-u.ac.jp

Errors were made in the calculations of EM s using the best fit normalizations in XSPEC. Lists of the errors and corrections are as follows.

1. Tables 1, 3, and 4 in ApJ, 557, 747 and astro-ph/0104190 (YSOs in ρ Oph)
All the EM s in these tables should be multiplied by π ; the $\log(EM)$ in the first row in Table 1, for example, is 52.6(52.2–53.2), not 52.1(51.7–52.7).
2. Figures 7 and 9 in ApJ, 557, 747 and astro-ph/0104190 (YSOs in ρ Oph)
The EM plots should be systematically up-shifted by the factor of π .
3. Table 3 in ApJ, 563, 361 and astro-ph/0108078 (young brown dwarfs in ρ Oph)
All the EM s in this table should be multiplied by π ; the $\log(EM)$ in the first row, for example, is 52.1(52.0–52.6), not 51.6(51.5–52.1).
4. Table 1 in ApJ, 567, 423 and astro-ph/0110462 (YSOs in Mon R2)
All the EM s in this table should be divided by 10; the $\log(EM)$ in the first row, for example, is 52.5(52.1–52.9), not 53.5(53.1–53.9).

All the spectral parameters except EM are unchanged. These errors of EM do not affect any of the conclusions of the relevant papers.

In addition, Gregorio-Hetem, J., Montmerle, T., Casanova, S., and Feigelson, E. D. 1998, A&A, 331, 193 should be included in the reference list of ApJ, 567, 423 (astro-ph/0110462).
